## PROJECTS

### SocioVerse | *MERN, Formik, Yup, Redux, MaterialUI*

Jan 2024 – Apr 2024

- A full stack application where users can connect, share posts, comment and like/dislike each other's posts.
- The users can also chat with each other and edit their profiles.

### Promptify | *NextJS, OAuth*

Nov 2023 - Dec 2023

- A fullstack CRUD based NextJS application where users can create prompts, edit and delete them.
- User can also search prompts created by other people as well as view their profile.
- It uses OAuth based authentication.

### YouTube Clone | *ReactJS, RapidAPI, Axios, MaterialUI*

July 2023 - July 2023

- A frontend web application which is similar in design to YouTube.
- The users can make a search query as well as view videos as per category selection.

## EXPERIENCE

### BISAG-N | *Intern*

16, Jan. 2024 – May 4, 2024

Document Management System

- Developed a web application using MERN Stack for managing documents efficiently.
- Implemented version control for documents and search functionality with filter options
- Users categorized into Super-admin, Admin (Department wise), and User, each with specific roles.
- Super-admin has all the rights like creating user (admin or user), providing access to admin.
- Users can view the forms, download them and request a change.

## CERTIFICATIONS

- C++ Course: Learning Essentials - Scaler Academy
- JavaScript Essentials - 1 - Cisco Networking Academy
- TCS Communication Skills - TCS
- TCS iON Career Edge - Young Professional - TCS
