PROJECTS

SocioVerse | *MERN, MaterialUI* | [Live Demo](#)

Apr 2024 – June 2024

- SocioVerse is a social media web app built with the MERN stack.
- Users can register and log in, create and delete posts, and interact with others through likes, dislikes, and comments.
- The app features real-time chat, profile management, password change/forgot password functionalities, and is mobile-friendly.

Promptify | *NextJS, OAuth* | [Live Demo](#)

Mar 2024 – Apr 2024

- A fullstack CRUD based NextJS application where users can create prompts, edit and delete them.
- User can also search prompts created by other people as well as view their prompts.
- It uses OAuth-based authentication.

Chichat | *MERN, Socket.IO* | [Live Demo](#)

Jan 2024 – Jan 2024

- A real-time chatting web application.
- Users can register, log in, use emojis and set avatars.

YouTube Clone | *ReactJS, MaterialUI* | [Live Demo](#)

July 2023 - July 2023

- A frontend web application which is similar in design to YouTube.
- The users can make a search query as well as view videos as per category selection.

EXPERIENCE

BISAG-N | *Intern*

16 Jan 2024 – 4 May 2024

Document Management System | *MERN*

- Developed a web-based Document Management System with Super-Admin, Admin and User panels. Super-Admin and Admin manage users and documents and Super-Admin can also add departments and create admin users. Users can view documents, make requests and change password. Additional features include search functionality, document version control and password management.
